

Indiana

Department of Local Government Finance

Committed to a fair and equitable property tax system for Hoosier taxpayers.

Public Hearing on Reassessment of Real Property in Jay County

**Department of Local Government Finance
Resolution #2007-05**

Auditorium, Jay County Courthouse
Portland, Indiana
September 14, 2007

Agenda

- **Public hearing will run from 10:00 a.m. – 12:00 p.m.**
- **The Need For Reassessment Of Real Property**
 - Accuracy and Equity
 - Lack of Adjustments to Commercial and Industrial Properties
- **How The Reassessment Will Be Handled**
 - Commercial and Industrial Properties
- **Opportunity For Public Comments**
 - Elected/Appointed Jay County Officials
 - Floor will be open for public comment
 - **Please note that each speaker is limited to 3 minutes for comments**

"Committed to a fair and equitable property tax system for Hoosier taxpayers."

The Need For Reassessment Of Real Property

"Committed to a fair and equitable property tax system for Hoosier taxpayers."

The Need for Reassessment of Real Property

o **Accuracy of Assessments**

Accuracy refers to how close the assessments determined by local assessing officials are to market value-in-use

o **Equity of Assessments**

Equity refers to how uniform assessments are within a class of property or geographic area

The Need for Reassessment of Real Property

- o Accuracy and equity are measured by conducting a statistical analysis known as an assessment-to-sales ratio study
- o The basic statistic in an assessment-to-sales ratio study is an assessment ratio

$$\text{Assessed Value} \div \text{Sale Price} = \text{Ratio}$$

The Need for Reassessment of Real Property

- o Assessment ratio for all properties in Indiana is to be 100%

$$\text{Assessed Value} \div \text{Sale Price} = \text{Ratio}$$

Example 1: $\$60,000 \div \$60,000 = 100\%$

Example 2: $\$54,000 \div \$60,000 = 90\%$

Example 3: $\$66,000 \div \$60,000 = 110\%$

The Need for Reassessment of Real Property

- o Using these ratios from sold properties and grouping them by township and class, an assessment-to-sales ratio study determines if assessments are accurate and equitable

The Need for Reassessment of Real Property

Statistical Measures

- o **Accuracy** is measured by the median ratio
 - o The median ratio is the “average” level of assessment for a class of property
- o **Equity** is measured by the coefficient of dispersion (COD)
 - o The coefficient of dispersion (COD) gives the relative dispersion, or variability of assessments from the median

The Need for Reassessment of Real Property

Standards

- o 50 IAC 21, the administrative rule governing annual adjustments sets the following standards for assessments:
 - o **Accuracy** – The median ratio for any class of property in a township should fall between 90% and 110%
 - o **Equity** - the coefficient of dispersion (COD) should be:
 - o $\leq 15\%$ on improved residential property; and
 - o $\leq 20\%$ on all other classes

The Need for Reassessment of Real Property

Standards

- o **Regressivity/Progressivity** – The Price Related Differential (PRD), which measures uniformity, for any class of property in a township should be between .98 and 1.03.

Results of Jay County Ratio Study

Accuracy

- o Unimproved commercial property assessments in Jay County were outside of the acceptable range of assessment accuracy required by 50 IAC 21.

Results of Jay County Ratio Study

Equity

- o Improved commercial and improved industrial property assessments in Jay County were outside of the acceptable range of assessment equity required by 50 IAC 21.
- o Unimproved commercial property assessments in Jay County were outside of the acceptable range of assessment equity required by 50 IAC 21.

Results of Jay County Ratio Study

Uniformity

- o The PRD for Improved Commercial and Improved Industrial property in Jay County was outside of the standard for assessment uniformity.
- o The PRD for Unimproved Commercial property in Jay County was outside of the standard for assessment uniformity.

Lack of Adjustments to Commercial and Industrial Properties

- o Analysis of Assessment Changes from 2005 to the 2006 assessment year revealed the following:
 - 1) A county-wide analysis of gross assessed values of commercial parcels revealed that ninety percent (90%) of these parcels had no change or a decline in assessed values from the 2005 assessment year to the 2006 assessment year.

Lack of Adjustments to Commercial and Industrial Properties

- o Analysis of Assessment Changes from 2005 to the 2006 assessment year revealed the following:
 - 1) A county-wide analysis of gross assessed values of industrial parcels revealed that ninety-five percent (95%) of these parcels had no change or a decline in assessed values from the 2005 assessment year to the 2006 assessment year.

How the Reassessment Will be Handled

"Committed to a fair and equitable property tax system for Hoosier taxpayers."

Securing a Vendor

- o Jay County officials may retain their vendor to conduct the reassessment. If Jay County desires a different vendor, they must go through the Special Procurement process of the Indiana Department of Administration.
- o The Department of Local Government Finance will have oversight of the vendor in that the vendor must be certified under 50 IAC 15-4-1 and must include in its contract the provisions required by IC 6-1.1-4-18.5 and IC 6-1.1-4-19.5
- o A checklist for these required contract provisions can be found at <http://www.in.gov/dlgf/local/assessor.html>
- o The Special Procurement process, if needed, is expected to be expedient (2 to 3 weeks)

Commercial and Industrial Properties

o Assumptions:

- o The underlying property data is correct
- o The Vendor will not be required to perform the work within the Jay County computer system
- o The Vendor will pull the values into their own system
- o The Vendor will be using 2005 pay 2006 Jay County Assessor Data

Commercial and Industrial Properties

- o The initial process is expected to use an updated cost approach in addition to updating land values:

$$\begin{aligned} &1999 \text{ RCN} \times \text{Cost Factor} = 2005 \text{ RCN} \\ &\quad - \text{Depreciation (6 years)} \\ &\quad = \text{Improvement Market Value} \\ &\quad \times \text{2005 Neighborhood Factor} \\ &\quad = 2005 \text{ Improvement Market Value} \\ &\quad + \text{2005 Land Market Value} \\ &\quad = 2005 \text{ Total Market Value} \end{aligned}$$

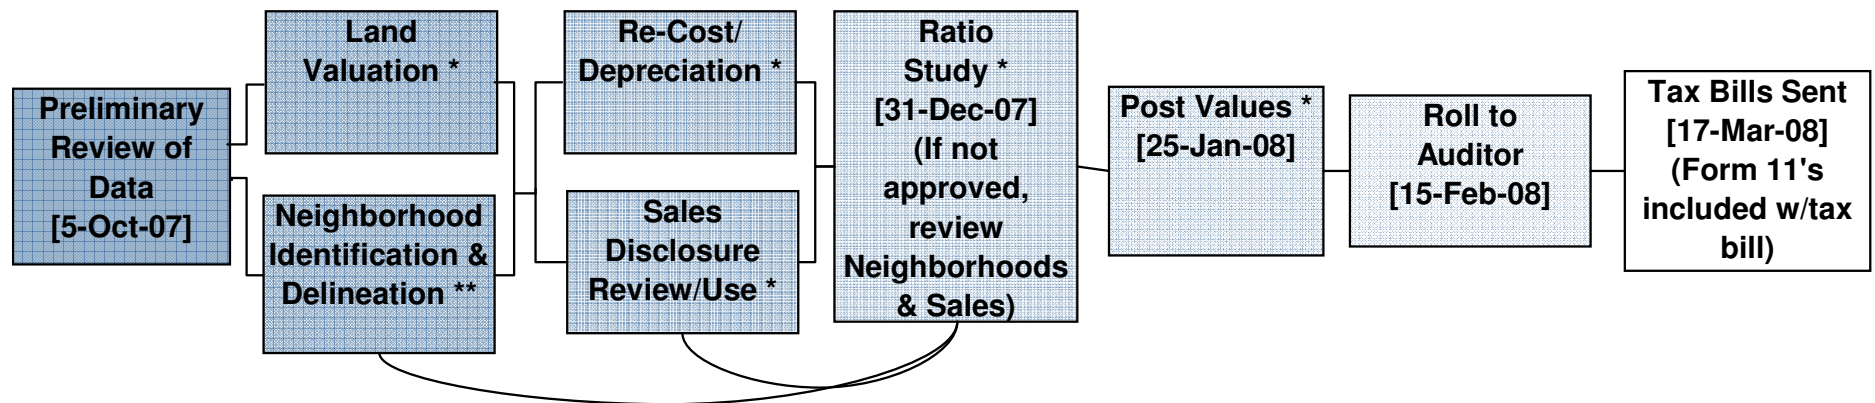

Commercial and Industrial Properties

- o The Neighborhood Factor (or Annual Adjustment Factor) will be based on Sales Disclosures from 2004 and 2005, with a January 1, 2005 valuation date
- o The Department will review and approve the reassessment work throughout the process
- o The reassessment of real property is expected to be completed by December 31, 2007, and assessed values shall be rolled to the County Auditor by February 15, 2008

Timeline for Jay County Commercial and Industrial Reassessments

* DLGF Review and Approval Process
